PROFESSIONAL SUMMARY

Highly skilled Flutter Developer with **4+ years of experience** and a proven track record of crafting user-centric, performant cross-platform mobile applications. Expertise includes designing intuitive UIs, implementing complex functionalities like offline data synchronization, and integrating diverse APIs. Currently specializing in advanced state management with Riverpod and AI agent implementation using the BMAD-method and Prompt Engineering.

TECHNICAL SKILLS

Programming Languages: Dart, Java

Frameworks & Platforms: Flutter, Android

State Management: Riverpod, GetX, BLOC

AI Technologies: GitHub Copilot, Claude, Prompt Engineering, AI Agent Implementation (BMad Method)

Development Tools: Android Studio, VS Code, SourceTree, GitLab, Jira

Backend & Other Skills: RESTful APIs, SQLite, Firebase, Multi-language support

PROFESSIONAL EXPERIENCE

Infosys Ltd. Sep 2025 – Present | Pune, India
Senior Associate Consultant

Project: Perkins My Engine App

- Spearheaded the mobile development and ongoing maintenance of the Perkins My Engine application using Flutter, enabling global users to seamlessly validate, register, and manage industrial engines.
- Provided comprehensive production support for the live application, proactively monitoring crash logs, resolving critical user-reported issues, and ensuring high application stability.
- Implemented core functionalities allowing users to track service logs, access vital engine documentation, and manage maintenance schedules, directly enhancing the post-purchase customer experience.
- Managed seamless release cycles and app updates on the Google Play Store, ensuring rapid delivery of feature enhancements and bug fixes to the production environment.

***Project:* E-commerce POC using BMad Method**

- Developed a scalable e-commerce Proof of Concept (POC) application using Flutter and Riverpod, improving state management efficiency by 30% and reducing unnecessary UI rebuilds.
- Adopted an AI-driven development approach aligned with Agile practices, utilizing the BMAD-method to accelerate POC development and validation, reducing overall development time by 30%.
- Applied Prompt Engineering techniques to optimize LLM interactions, improving accuracy of contextual UI features by 20%.

Suma Soft Pvt. Ltd. Nov 2021 – Jun 2025 | Pune, India
Junior Software Engineer

Project: Loan Processing & Agent Management Application

- Built a Flutter-based mobile solution to streamline loan processing workflows, improving agent productivity by 25%.
- Enabled real-time capture of customer dispositions (e.g., "Interested" or "Call Back"), increasing data accuracy for follow-ups by 20%.
- Implemented features for agents to input detailed remarks regarding customer conversations to ensure comprehensive data capture.

Project: Insurance Cost Calculator & Payer Ranking Model

- Developed a sophisticated cost calculator using Flutter, allowing users to instantly generate insurance cost estimations.
- Engineered the backend logic for calculating insurance costs based on various user-entered parameters.
- Implemented an algorithm to rank and display the top 10 relevant insurance payers based on calculated costs and geography, contributing to a 25% increase in user engagement.

Project: Call Center Management Application

- Developed a cross-platform mobile application using Flutter to enhance call center operations and agent productivity.
- Implemented a robust in-app calling feature to enable seamless communication directly within the application.
- Designed and built intuitive user interfaces focused on optimizing agent workflows and improving user experience.

Project: Mobile Audit & Compliance Management System

- Engineered a native Android (Java) application to facilitate internal audits and compliance checks across departments.
- Implemented comprehensive multi-language support, enabling seamless usability for a diverse global workforce.
- Designed sophisticated offline data storage and synchronization mechanisms to ensure data capture in limited connectivity.

EDUCATION

Master of Computer Applications 2016 – 2019 | Belagavi, India
Jain College of Engineering

Bachelor of Computer Applications 2013 – 2016 | Gokak, India
Shri Siddhalingeshwer BCA College

CERTIFICATES

- GitHub Copilot
